CZECH REPUBLIC - Ceska Federace Potravinovych Bank
Food Banks in Czech Republic saved over 100 tons of school dairies and fruit programs, which should have been wasted because of closing schools. Food Banks managed all distribution between population, mainly with help of city councils and villages authorities. Thanks to the daily operations of Food Banks, products such as milk, cheese and fruit are destined to people, not only in need but also to people who are old or disabled, or just mums with more kids.

This was realized in cooperation with Ministry of Agriculture: link to the article here.

Food Banks in Czech Republic also prevented wasting food from HORECA sector and school canteens. It also bring a lot of tons especially in bigger cities (link to the article here).

DENMARK - Foedevarebanken

In Denmark, the Food Bank works as normal with our donors, producers and wholesales. They have been in close contact to ensure more or less the same amount of food in this period and close future.

Because of the Covid close down, Food Bank had many inquiries from restaurants and business related to the HORESTA industry (trade association and employers organization for the restaurant, hotel and tourism industry in Denmark).

For example Gate Gourmet, trying to help them all due to the closure and Food Bank got some very good food for the charities.

ESTONIA - Toidupank

In Estonia, many restaurants, catering and wholesale firms are closed down or work only on a small part of their capacity. So they have a lot of food in their warehouses, cold rooms and deepfreezerooms.

Some restaurants decided to use their surplus food to make deepfreeze soups for the Food Bank. Last week Toidupank received 100 soups, this week 400 soups and for the following weeks the amount is
Volunteers and social workers bring the soups to elderly people and sick people who can not leave their homes.

Also many other firms (importers, hotels, spa’s, ferry companies, caterers for airplanes, food producers, cinemas, supermarkets) gave surplus food to the Food Bank that they could not sell. With these portions we also hope to serve children and families who need ready made food at home.

POLAND - Federacja Polskich Bankow Zywosci

Polish Federation of Food Banks is redistributing food at risk of being wasted in the government's "School Program" due to closed schools. Food Banks collect food from suppliers participating in the "School Programme" under the guidelines published by the ARMA (on the website of the Agency for Restructuring and Modernisation of Agriculture – [link here]).

Moreover, it was published a communication from the Agency for the Restructuring and Modernisation of Agriculture containing "Guidelines for approved suppliers/approved primary schools participating in the School Programme for the school year 2019/2020 – [link here]."
